

## Introducing the Optima RFID Lock

**W**e are proud to present the latest addition to the fine line of Timelox electronic door locks: Optima RFID. Like the other Timelox card-based systems, the Optima RFID incorporates superb flexibility with simplicity of use. The elegant minimalistic design makes the Optima RFID the lock of choice for design conscious hotels. The Optima RFID is compatible with NFC (near field communication) standards as well as other major international standards.

### Enhancing the Guest Experience

Guests will enjoy the simplicity of lock operation without card insertion. The three color LED feedback includes low battery indication. Guests can be supplied with a range of RFID carriers like wristbands and key fobs. Guest cards can be issued for late joiners, suites, VIP privileges and more.

### Advanced Security Features

The Optima RFID includes many advanced security features. In case of staff card loss or turnover, there is no need to update individual locks when the Validity Option is enabled. Timelox Moving Log™ technology registers over two thousand lock history activities on the card. Enhanced security is provided through anti-cloning card technology and encrypted card data.

### Staff-Management System

Timelox card-based technology allows management to administer staff operations in a more efficient manner. Using TimeLox DC-One software, management can issue flexible staff cards with a virtually unlimited set of customized access rules based on rooms, floors, door area, date and time restrictions, etc. Optional SMS or email notification can be set for pre-defined events. Best of all, the Auto Update Option automatically updates staff card access rights without the need for front desk intervention.

The Optima RFID series joins the flexible TimeLox DC-One System

which integrates magnetic cards with high-capacity smart cards, and the reliable TimeLox 2300 System. ■

**SafeScoop is published by Safeplace for a select audience of international hoteliers. In this issue:**

- Introducing Optima RFID
- Opening at Intercontinental Times Square
- The Hyatt Tradition
- Returning to the Crown Melbourne
- Safeplace at Pechanga
- Timelox in Athens
- New Solution for Safe Rentals

Grand Hyatt Macau Lobby

The Grand Hyatt Macau is located off the tip of Macau Peninsula in the Cotai area. This exclusive hotel is part of the City of Dreams urban resort center and features 791 rooms and suites with spectacular views. The two distinct towers offer spacious comfort, whether for business or leisure travelers. All the stylish guest rooms are equipped with Safeplace Magna 800 safes.

Hong Kong's Hyatt Regency Tsim Sha Tsui is situated in the heart of the business district in one of the tallest skyscrapers in Kowloon. The 381 rooms and suites offer spectacular views of Victoria Harbour and Hong Kong Island. Like its sister hotel, the Hyatt Regency Shatin which installed Safeplace the previous year, the Hyatt Regency Tsim Sha Tsui chose deluxe Safeplace Magna 800 safes for all its guestrooms. ■

## Continuing the Hyatt Tradition

Safeplace is no stranger to the Hyatt Hotel Corporation, with Hyatt hotel installations in China, the United States, Philippines, UK and many other countries. Two prestigious Hyatt hotels recently added Safeplace to their fine guest rooms, continuing our long tradition of serving Hyatt.

## Return Appearance at the Crown Complex

The Crown Entertainment Complex in Melbourne Australia is the center of one of the largest and most exciting gaming facilities in the Southern Hemisphere. The crown jewel in the complex is the Crown Towers Hotel, the benchmark for luxury hotels in Australia. All of Crown Tower's guest rooms have spectacular views of Melbourne or Port Philip Bay and are located close to Melbourne's central business district.

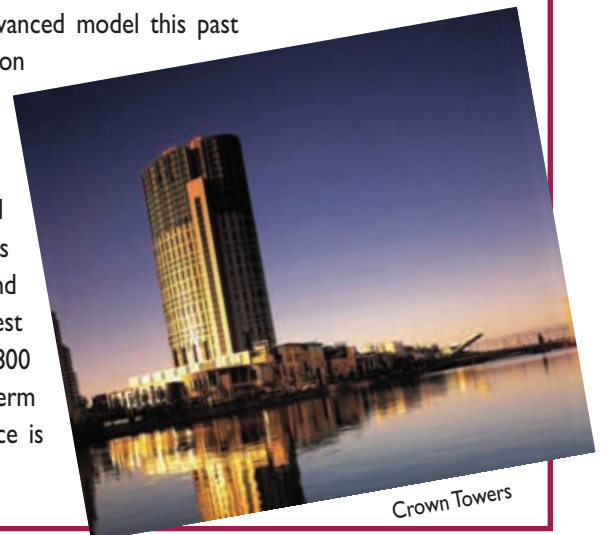

Each of the 481 oversized guest rooms features original artwork, spacious marble bathrooms and the latest in-room technology, including large plasma screen, iPod docking station, Video on Demand interactive system and, of course, Safeplace electronic safes.

First installed in the Crown Towers in 1996, Safeplace safes have stood the test of time so well that the hotel only began upgrading to a more advanced model this past year. And when it came time to outfit the latest addition to the Crown Entertainment Complex, the Crown Metropolis, Safeplace was the safe of choice.

Due to open in summer 2010, the Crown Metropolis is home to 658 designer-inspired rooms and suites with a signature restaurant by Gordon Ramsay and Melbourne's only urban day spa and retreat. All guest rooms have been equipped with Safeplace Magna 800 laptop size safes. Safeplace is proud of its long term relationship with Crown hotels. A return appearance is the best compliment we could ask for! ■

## Opening Soon: Intercontinental Times Square

**T**he Intercontinental New York Times Square is the biggest new-build hotel in New York City since 2002. All thirty-six stories and 607 guest rooms are installed with Safelace safes. Located in the heart of the New York theatre district within walking distance of forty theatres, the hotel is due to open in summer 2010.

Upon completion, the Intercontinental Times Square will be one of the most environmentally friendly hotels in New York City. It has obtained LEED® certification from the U.S. Green Building Council based on the green design and construction features, including the use of sustainable materials such as roofing with low solar heat gain, green roofs with drought tolerance, low maintenance plantings, large windows to maximize natural day light and an energy-generating elevator system. ■

## Betting on Safeplace

**T**he Pechanga Resort & Casino is known as the largest casino in the western United States and has more casino floor space and slot machines than even the MGM Grand in Las Vegas. Located in Southern California Wine Country, an hour south of Los Angeles, it was built by the Pechanga Band of Luiseño Indians in 2002 in order to help the Tribe achieve self-sufficiency.

But the Pechanga Resort & Casino is more than just a gaming facility. It is an all-inclusive resort destination offering a luxury hotel with a full service spa, several fine restaurants, the largest nightclub in Southern California, a concert venue, world-title boxing events and a brand new 18-hole golf course.

In addition to these fine amenities, guests of Pechanga will also find Safelace laptop size or wall model guest safes in every room. ■

Pechanga Resort Deluxe Room

## “Y” Timelox?

**B**outique hotels in Athens are something of a rarity. That's why the new “Y” Hotel in the elegant northern suburb of Kifissia is such a find. Located in a popular neighborhood known for its upscale designer stores, restaurants and night spots, the recently renovated “Y” is perfect for short or extended stays, priding itself on excellent concierge service, fully equipped guest rooms and business facilities as well as its own garden.

The “Y” Hotel chose the reliable Timelox 2300 operating system for its door lock needs. Taking only minutes to install, the Timelox 2300 S-series is perfectly suited for renovation projects since it requires no cut-outs or additions to the door and is fully upgradeable to other Timelox systems. ■

# Safeplace Innovation Overcomes Safe Rental Hassles

In many niche markets there is a clear need for providing rental safes. This is especially relevant for hospitals, locker rooms in spa and fitness facilities, public areas, and some hotels. Often the rental safe concept is discarded up front, however, because the cost of keys and manpower outweigh the advantages of the rental system. The challenge lies in formulating an efficient system that will provide control over safe operations with minimal costs.

## The Innovative Safeplace Solution

Until today, the basic concept for rental systems has been the use of an activator key which initiates safe operation when an authorized user inserts the key into the safe. Now Safeplace has developed a code activated system that eliminates the time-consuming task of issuing and collecting keys.

## How It Works:

The Safeplace Rental System is software based. Once the customer's safe number and the number of rental days are entered into the program, the software issues an activation code. The customer then enters the activation code in the designated safe, which activates the safe for the required rental period. Following this initialization process, the safe will operate normally using any personal user-selected 4 digit code.

The Safeplace Rental System eliminates the well-known hassles involved in safe rental, making the safe a significant profit-center. For further information, please feel free to contact us. ■
